---

## PROJECTS

### BGWRAP - [Link](#)

BGWRAP is a Figma plugin for fast, high-precision background removal with support for single and bulk image processing

### Grayscale Wireframe Converter - [Link](#)

Grayscale Wireframe is a Figma plugin that instantly converts designs into clean grayscale wireframes by simplifying colors, replacing images with placeholders, and preserving visual hierarchy

### User Flow - [Link](#)

It is a Figma plugin that converts complex designs into structured user flow diagrams, simplifying UX reviews, navigation planning, and information architecture
